

Activity: Student Bio Website Design

Objective: Use HTML/CSS and Photoshop to Design your personal site.

Requirements:

- You will use HTML and CSS with an HTML editor (Sublime Text or other) and Photoshop for this activity.
- You must attach a style sheet to each page.
- Use divs for formatting each page.
- Site must have a total of at least four (4) pages includes (index.html, profile.html, gallery.html, contact.html). You may add one (1) additional page to the site that you did not already have—something to do with a specific hobby or interest.
- Your home page (index.html) must remain your bio page.
- Your pages should be between 800 and 1000 px wide.
- Decide on an appropriate navigation strategy with four (4) <a> states (a:link, a:visited, a:hover, a:active). You must change the color of the navigation—make it different from the default.
- Design your own logo and/or header in Photoshop and include it on your site.
- Include at least one (1) image on each page. Images must be optimized in Photoshop and should be no larger than 100 kb. (Image on your home page/bio must be a picture of you.)
- Include at least one (1) list other than the navigation.
- Include at least one (1) table on the site.
- Include your email address somewhere on the site.
- Add the date to the bottom of the home page. Update this every time you make a change.
- Make sure you save all files with the appropriate extension (.html, .css, .jpg, etc.) and that all file names are lowercase and do not include any spaces. (For example: index.html, style.css, myphoto.jpg)
